

HI Entry Form — Faculty Track

Human Input worksheet for the HI-HO Framework™. Complete before generating with AI.

Why this worksheet exists

HI — Human Input — is where you encode intent before the AI generates anything. A strong HI is the difference between an output you can defend and one you can't. Fill this in *before* you prompt.

1. Learning outcome

What specific outcome must this AI-assisted output advance?

2. Audience & context

Course, level, prior knowledge, accessibility needs.

3. Source material the AI must use

Readings, syllabus sections, rubric — paste or attach.

4. Constraints

Tone, length, format, things to avoid.

5. What 'good' looks like

One sentence describing the ideal output.

Now prompt the AI

Paste or paraphrase the contents of this worksheet into your prompt. Then move to the HO Checklist before anything reaches another person.
