

# HI Entry Form — Industry Track

Human Input worksheet for the HI-HO Framework™. Complete before generating with AI.

## Why this worksheet exists

HI — Human Input — is where you encode intent before the AI generates anything. A strong HI is the difference between an output you can defend and one you can't. Fill this in *before* you prompt.

### 1. Decision or deliverable

What will be produced, and what decision does it support?

### 2. Audience & stakes

Who receives it; what happens if it's wrong?

### 3. Authoritative inputs

SME-verified facts, policy, data sources.

### 4. Constraints

Brand voice, regulatory limits, off-limits topics.

### 5. Definition of done

What a sign-off-ready draft must contain.

### **Now prompt the AI**

Paste or paraphrase the contents of this worksheet into your prompt. Then move to the HO Checklist before anything reaches another person.
